STIDENT PAGE Making a Soil Shake

NA	ME	DATE
1.	Describe where your soil is from.	
	Where did you get it?	
	What was growing there?	
	What else did you notice?	
	• Draw a picture of the site.	
	Draw a picture of the site.	

2. Describe the soil.

- What color is it? ______
 - How does it feel? ______
- How does it smell? ______
 - What do the largest soil particles look like? The smallest?

3. Make a soil shake:

- Place about one-half cup (120 mL) of soil into a jar.
- Add about 2 cups (500 mL) of water.
- Put the lid on tight.

What do you think will happen if you shake the jar and let it sit for a couple of hours or overnight?

Making a Soil Shake (cont.) STUDENT PAGE

NAME

4. Shake the jar hard for a minute. Draw what the soil and water mixture look like right after shaking.

5. Let the jar sit untouched for a few minutes. What do you notice happening? Write or draw what you observe.

6. Let the jar sit untouched for several hours or overnight. Draw what the contents of the jar look like after sitting for this amount of time.
