

TEAM MEMBERS: _____

Your topic (circle one): Housing Water and Wastewater Green Space

Your time period (circle one): 1900s 1960s Today

1. Summarize what you already know about this topic.

2. Identify three topic-related questions to guide your research.

i. _____

ii. _____

iii. _____

3. How will you gather information to answer the questions above?

i. _____

ii. _____

iii. _____

4. What resources do you intend to start with?

CAREER CORNER

LAND SURVEYORS measure parcels of land to determine property boundaries and other land features. They use a variety of tools to measure distances, areas, and elevations of reference points and human-made structures, and their findings are essential for many forest projects. For profiles on this and other forest careers, see Explore Forest Service Green Jobs at plt.org/usfsgreenjobs.
