

Evergreens in Winter

Activity 6

Family and Friends: Things To Do Together

We are exploring evergreen trees at school. Here are some activities you and your child can do together:

- Search for evergreen-scented items in your home (e.g., air fresheners, car fresheners, cleaners, or deodorants). Talk about why you like or don't like the smell.
- Take a walk through an evergreen forest. Look for ways that evergreens provide protection from wind, rain, and snow.
- Enjoy a fun wintertime activity together.
- Bundle up and enjoy an early evening stroll around your yard, neighborhood, or nearby park. Look for ways that animals survive in winter.
- Prepare some hot tea or cocoa.

Help build your child's vocabulary by using some of these new words in your conversations:

We are reading the following books in class. Check them out from your library, and invite your child to share them with you.
