

## World Forest Market Rules

**Object:** Each country works to have as much money as possible at the end of the simulation.

**The Play:** Each country gets an envelope containing that country's resources. Countries make money by manufacturing products from their forest resources.

**Rules:**

- Countries may trade the resources in their envelopes with other countries, but they may not use any other materials. They may not cut up the envelope itself.
- Countries may use their trees to make any of the products shown on the Spec Sheet.
- All products should be cut with clean, sharp edges using scissors, and should be the exact sizes shown on the Spec Sheet.
- Countries can sell products to the International Trader, who will check them for accuracy and exchange them for cash. Any product that is inaccurate will be rejected.
- Each product is worth the amount shown on the Spec Sheet.

A pdf of this Box is available at [www.plt.org/curriculum](http://www.plt.org/curriculum).
